PALESTINE MILL IS REBUILT AFTER FIRE

—Warsaw TIMES & UNION Photo.
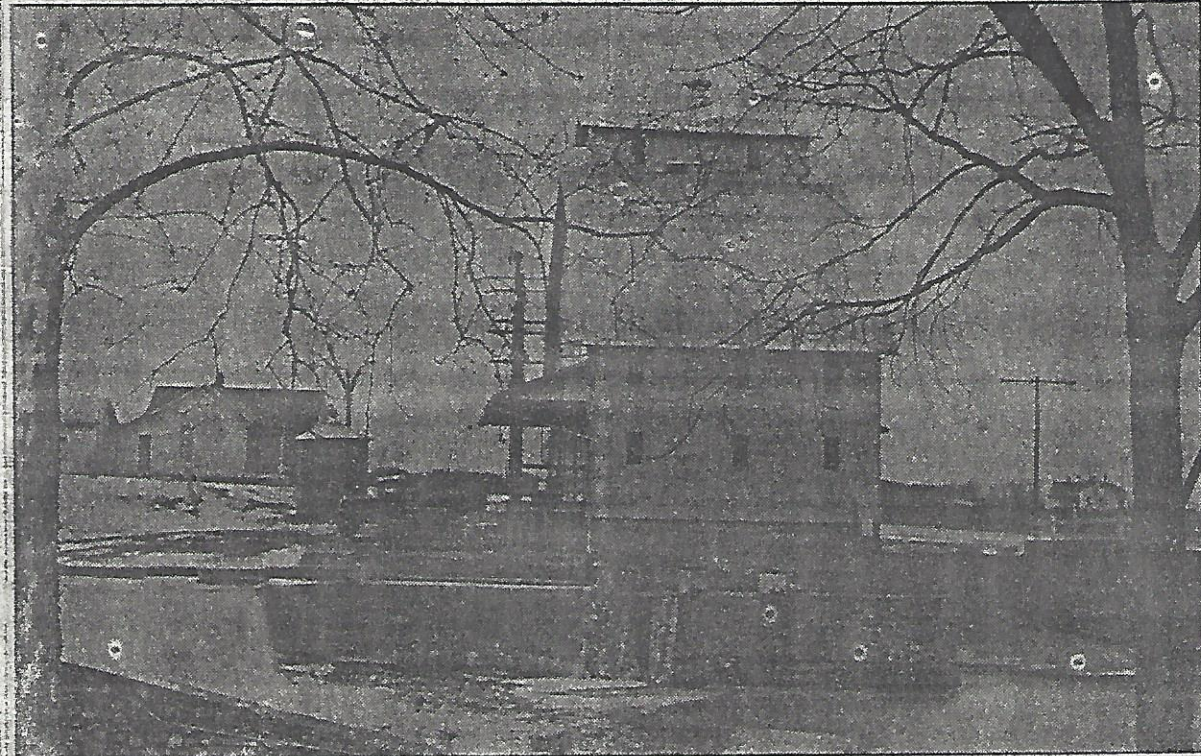

Century-old Palestine Mill, a historic landmark in Koscinsko county, has been rebuilt following a disastrous fire some time ago, and is pictured here bigger, better and ready to serve the community's needs. The mill is located on road 25 at Palestine lake, six miles south-west of Warsaw. Owner Ed Shirey stated today that he started rebuilding after the blaze at the insistence of hundreds of residents who did not want to be without a local mill. New equipment featured in the mill was built by the Prater Pulverizer company of Chicago. Main feed lines handled by the new concern will be Waseo, manufacturered at Ligonier, and Murphy Company of Wisconsin. Grand opening week is being celebrated this week. The general public is invited to go through the new mill.
